What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The variable rate of return of the Securities is dependent upon the performance of EUR CMS 30Y and EUR CMS 5Y.

2. Risks related to the structure of the securities:

During any period when the Issuer may elect to redeem the Securities the market value of the Securities may be limited.

3. Risks related to disruption and adjustments:

If an Administrator/Benchmark Event occurs, the Securities may be subject to adjustment or early redemption. Such consequences may have a material adverse effect on the value and liquidity of the Securities and/or the return a Holder can expect to receive on their investment.

4. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the time remaining until the scheduled redemption date of the Securities. The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

5. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.
