

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – Other than with respect to the jurisdiction(s) in which a key information document will be made available, the Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (the "Insurance Distribution Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended, the "Prospectus Regulation"). Consequently, save as provided above, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the Securities or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

MiFID II product governance / Retail investors, professional investors and ECPs target market – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Securities, taking into account the five categories in item 18 of the Guidelines published by the European Securities and Markets Authority ("ESMA") on 5 February 2018, has led to the conclusion that: (i) the target market for the Securities is eligible counterparties, professional clients and retail clients, each as defined in MiFID II; and (ii) the following channels for distribution of the Securities are appropriate – investment advice, portfolio management and non-advised sales, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Securities (a "distributor") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates
7. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates
8. The BNP Paribas Group may incur substantial fines and other administrative and criminal penalties for noncompliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the Securities:

The return on the Securities depends on the performance of the Reference Bonds and the credit of the Reference Bond Issuers. Investors may be exposed to a partial or total loss of their investment.

2. Risks related to the trading markets of the Securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Reference Bonds, the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Reference Bonds and the correlation risk of the Reference Bonds. The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

3. Legal risks:

The terms of the Securities contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

4. Exposure to credit risk of Reference Bond Issuers:

The Securities create exposure to the credit risk of the Reference Bond Issuers. Upon the occurrence of one or more of the Early Redemption Events which relate to the Reference Bonds or the Reference Bond Issuers, the Holders may suffer significant losses at a time when losses may be suffered by a direct investor in obligations of such Reference Bond Issuers. However, the holding of a Security is unlikely to lead to outcomes which exactly reflect the impact of directly investing in the Reference Bonds, and losses could be considerably greater than would be suffered by a direct investor in the Reference Bonds and/or could arise for reasons unrelated to such Reference Bonds.

5. Limited Recourse Obligations:

The Securities are direct, secured, limited recourse obligations of the Issuer. payable solely out of the assets over which the Issuer has granted security in favour of the Security Trustee on behalf of, among others, the holders of the Securities. If the proceeds of the realisation received by the Security Trustee for the benefit of the holders from the Charged Assets are insufficient to make payments on the Securities after deduction of the amounts payable in priority to the amounts due to the holders, no other assets or sources of revenue will be available for payment of any shortfall, and, following distribution of the proceeds of such realisation, the obligation of the Issuer to pay such shortfall shall be extinguished.

6. Subordination of holders to payment of expenses and other payments:

On enforcement of the pledge agreement entered into by the Issuer and other applicable security agreements, the proceeds of such enforcement and realisation of the Charged Assets will be used to pay (i) any fees and expenses incurred in enforcement and realisation of the Charged Assets, (ii) fees and other amounts due to the Security Trustee (and any agents appointed by it) and (iii) amounts due from the Issuer to BNP Paribas as swap counterparty and as collateral exchange counterparty before being used to pay holders of the Securities. This will reduce the amount available to be paid to the holders in the event of enforcement of the security and increase the likelihood of the holder suffering a loss.

7. Reliance on creditworthiness of other parties:

In certain circumstances, the Issuer will be dependent on the performance and creditworthiness of other parties in order to pay amounts due in connection with the Securities. These include BNP Paribas as the Swap Counterparty where the Issuer has paid the redemption proceeds from the Reference Bonds to the Swap Counterparty and therefore the ability of the Issuer to make payment of amounts due under the Securities will be dependent on the receipt by it of payments from the Swap Counterparty. If the Swap Counterparty is unable to pay the sums due under the Swap Agreement, holders may lose all or a substantial part of their investment in the Securities.

Mest väsentliga riskfaktorer som gäller garanten

- En väsentlig ökning i nya avsättningar, eller ett underskott i nivån på tidigare redovisade avsättningar som varit exponerade för kreditrisker och risker vad gäller motparter skulle negativt kunna påverka BNP Paribas Grupp verksamhetsresultat och finansiella ställning.

2. Ett avbrott eller en störning i BNP Paribas Grupp informationssystem kan förorsaka väsentlig förlust av kundupplysningar, skada BNP Paribas Grupp rykte och leda till ekonomiska förluster.
3. BNP Paribas Grupp kan ådra sig väsentliga förluster vid handels- och investeringsverksamhet till följd av valutakursfluktuationer och volatilitet.
4. Justering av balansvärdet på BNP Paribas Grupp värdepappers- och derivatportfölj och BNP Paribas Grupp egen skuld skulle kunna ha en negativ effekt på årets resultat och eget kapital.
5. BNP Paribas Grupp tillgång till och kostnader för finansiering skulle kunna påverkas negativt av nya ekonomiska kriser, sämre konjunkturläge, lägre kreditvärdering, ökning av creditspreaden eller andra faktorer.
6. Ogynnsamma ekonomiska och finansiella villkor har tidigare påverkat och kommer kanske i framtiden att påverka BNP Paribas Grupp och marknaden i vilken den verkar.
7. Lagar och bestämmelser som antagits under senare år, särskilt som svar på den globala finanskrisen så väl som nya lagförslag kan väsentligen påverka BNP Paribas Grupp och den finansiella och ekonomiska miljö i vilken den bedriver sin verksamhet.

Vilka är de centrala riskerna som är specifika för värdepapperna?

Mest väsentliga riskfaktorer som är specifika för värdepapperen

1. Risker relaterade till värdepapperens struktur: Avkastningen på Värdepapperen är beroende av Referensenheternas kredit, och kapitalskyddet gäller endast vid förfall och enbart om Värdepapperen inte har lösts in i enlighet med Kreditvillkoren.
2. Risker relaterade till Referensenheten: Investerare kommer att exponeras mot kreditrisken för en eller flera Referensenheter (generellt sett är risken att en given sådan enhet inte fullgör sina finansiella förpliktelser när de förfaller eller blir insolvent), denna exponering kan omfatta hela deras investering i sådana Kreditvärdepapper. Om en Kredithändelse inträffar kan investerare drabbas av betydande förluster.
3. Korrelerade Kreditrisker: Vid köp av Värdepapperen tar investerare kreditexponering mot både Referensenheterna och Emittenten och Garanten. Kreditrisken för investerare kan öka ytterligare om Referensenheten är koncentrerad till samma industrisektor eller geografiska område som Emittenten eller Garanten.
4. Åtgärder från Referensenheterna kan påverka värdet på Kreditvärdepapperen: Åtgärder från Referensenheterna (till exempel fusion eller delning eller återbetalning eller överföring av skuld) kan negativt påverka värdet på Kreditvärdepapperen. Innehavare av Kreditvärdepapper bör vara medvetna om att den Referensenhet som värdet på Kreditvärdepapperen är exponerad mot, och villkoren för sådan exponering, kan ändras under Kreditvärdepapprens löptid.
5. Avstängning av Förpliktelser kommer att skjuta upp betalning av kapitalbelopp och ränta: Under vissa omständigheter (till exempel när en Kredithändelse har inträffat och den relaterade kreditförlisten inte har fastställts vid den relevanta dagen för betalning, eller, om tillämpligt, när en potentiell Kredithändelse inträffar vid den planerade förfallodagen för Värdepapperen), kan investerare påverkas negativt om betalningen av inlösenbeloppet på Värdepapperen helt eller delvis skjuts upp under en väsentlig period utan kompenstation till investerarna.
6. Risker relaterade till värdepapperens handelsplatser: Värdepappernas handelskurs kan påverkas av ett antal faktorer inklusive, men inte begränsat till, den relevanta kurserna, värdet eller nivån på Referensenheten, den tid som återstår tills planerad inlösning för Värdepapperen, den faktiska eller implicita volatiliteten förknippad med Referensenheten och korrelationsrisken för Referensenheten. Möjligheten att Värdepappernas värde och handelskurs kommer att variera (antingen positivt eller negativt) beror på ett antal faktorer som investerare bör överväga noggrant innan de köper eller säljer Värdepapper.
