## **What are the key risks that are specific to the securities?**

### **Most material risk factors specific to the securities**

There are also risks associated with the Securities, including:

#### **1. Risks related to the structure of the securities:**

The return on the Securities depends on the performance of the Underlying Reference(s) and investors may be exposed to a partial or total loss of their investment.

#### **2. Risks related to the underlying and its disruption and adjustments:**

The Securities are linked to the performance of an underlying fund. The value of the shares of a fund will be affected by the investment strategy of said fund. The investment strategy is often opaque and may not be publicly available. In addition, funds are often illiquid and/or unregulated. If the investment strategy does not perform as expected, there are limited methods by which direct investments in fund shares can be exited. The value of the fund shares is also exposed to the performance of various fund service providers, in particular, the investment adviser. Taking these circumstances into account, compared to other types of investment, there is a greater risk that the value of these fund-linked Securities may be adversely affected and the return an investor can expect to receive may be less than expected. Furthermore, the occurrence of certain extraordinary events in respect of the underlying fund may have an adverse effect on the value or liquidity of the Securities and the amount holders of the Securities can expect to receive on their investment.

#### **3. Risks related to the trading markets of the securities:**

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

#### **4. Legal risks:**

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

### **Most material conflicts of interest pertaining to the offer or the admission to trading**

The Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their respective affiliates in the ordinary course of business.

Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Financial Markets, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. #### Vilka är de centrala riskerna som är specifika för värdepapperna?

#### Mest väsentliga riskfaktorer som är specifika för värdepapperna

Det finns även risker som är förknippade med Värdepapperna, inklusive:

1. Risker som är relaterad till värdepappernas struktur:

Avkastningen på värdepapperna beror på avkastningen på de underliggande referenserna och kapitalskyddet endast tillämpas på förfallodagen.

2. Risker som är relaterade till de underliggande och dess avbrott och justeringar:

Värdepapperen är relaterade till utvecklingen för en underliggande fond. Värde på andelarna i en fond kommer att påverkas av investeringsstrategin för sagda fond. Investeringsstrategin är ofta inte transparent och kanske inte är tillgänglig för allmänheten. Vidare är fonder ofta illikvida och/eller oreglerade. Om investeringsstrategin inte utvecklas som väntat, finns det begränsade metoder genom vilka direkta investeringar i fondandelar kan avslutas. Värdet av fondandelarna är även exponerat mot utvecklingen för olika fondserviceleverantörer, särskilt investeringsrådgivaren. Med dessa omständigheter i åtanke, jämfört med andra typer av investeringar, finns det en större risk att värdet på dessa fondrelaterade Värdepapper kan påverkas negativt och att avkastningen en investerare kan förvänta sig att erhålla kan vara mindre än förväntat. Vidare kan inträffandet av vissa extraordinära händelser avseende den underliggande fonden ha en negativ påverkan på värdet eller likviditeten för Värdepapperen och beloppet som innehavare av Värdepapperen kan förvänta sig erhålla på sin investering.

3. Risker som är relaterade till handel med värdepapper:

Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive, men inte begränsat till, det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referensen och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Möjligheten att Värdepapperets kurs kommer att fluktueras (antingen uppåt eller nedåt) beror på ett antal faktorer som investeraren noggrant borde överväga innan köp eller försäljning av Värdepapper.

4. Rättsliga risker:

Villkoren för Värdepapper kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella värdepapper för att belysa frågor som generellt sett påverkar deras intressen. Dessa bestämmelser ger angivna majoriteter rätten att fatta beslut som binder alla innehavare, inklusive innehavare som inte har närvarat eller röstat på aktuellt möte och innehavare som röstat mot majoriteten.

### Mest väsentliga intressekonflikterna rörande erbjudandet eller upptagandet till handel

Förvaltaren och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud och kan även utföra handelsrelaterade verksamheter (inklusive risksäkringsverksamhet) som hänförs till Underliggande och andra instrument eller derivatprodukter baseras på eller som är relaterade till de Underliggande. Detta kan försäkra möjliga intressekonflikter.

BNP Paribas Financial Markets SNC som verkar som Förvaltare och Beräkningsombud, är ett Dotterbolag till Emittenten och Garanten och potentiella intressekonflikter kan finnas mellan Värdepappernas innehavare, inklusive och med hänsyn till vissa beslut och bedömningar som Beräkningsombuden måste göra. De ekonomiska intressena hos Emittenten och hos BNP Paribas Financial Markets SNC såsom Förvaltare och Beräkningsombud, är potentiellt motsatta till intressena hos Innehavare av Värdepapperna.

Annat än vad som nämnts ovan och såvitt Emittenten vet, har ingen person som är involverad i Värdepappersemissionerna något intresse i erbjudandet, inklusive de motstridiga intressena.
